DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Bruchmann et al U.S. patent 6,617,413.

3. Bruchmann discloses a coating composition comprising a compound having isocyanate groups wherein said compounds are present in blocked form, column 4, lines 35-40. Blocking agents are readable in the present claims 1 and 5. The compounds having isocyanate groups can be alicyclic polyisocyanate, column 3, lines 10-25, column 4, lines 59-60, column 5, lines 5 and 29-31. The polyisocyanate represented by formula I, column 3, line 15, wherein R1 are alicyclic units and R2 is N-C(O)-R3 wherein R3 is, for example, 2-hydroxyethyl (meth)acrylate, is readable in applicants' claimed (a) (cyclo)aliphatic polyisocyanate, see column 3, line 10-25, column 11, lines 10-17 and 27-30. The polyisocyanate groups can be blocked with pyrazoles derivative, column 4, lines 35-38. The compound of formula I can include in addition

reactive diluents including esterified polyalcohols, column 8, lines 51-53, 63-66 and column 9, lines 1-17. The reactive diluents are hydroxy-functional polymer, which is readable in applicants' claimed (b) component. The coating composition is UV curable, column 9, line 64 and column 12, lines 8-11 and 29-31. The polyisocyanate composition is a dual-cure composition, column 12, line 11 and column 1, lines 55-66.
